THE PROBLEM

Email is not an approval system.

Important documents still bounce through inboxes and chat threads. Approvers change mid-flight. Versions multiply. When audit asks “who signed off?”, the answer is a scavenger hunt.

Unclear ownership
Nobody knows whose turn it is.

No durable trail
Decisions live in inboxes and chat threads.

Awkward Microsoft approvals
Simple approval apps and flows don’t cover versions, voting or audit.

MICROSOFT 365

Lives in your Microsoft estate

Chainline uses Microsoft Entra ID and Teams — not a parallel identity silo.

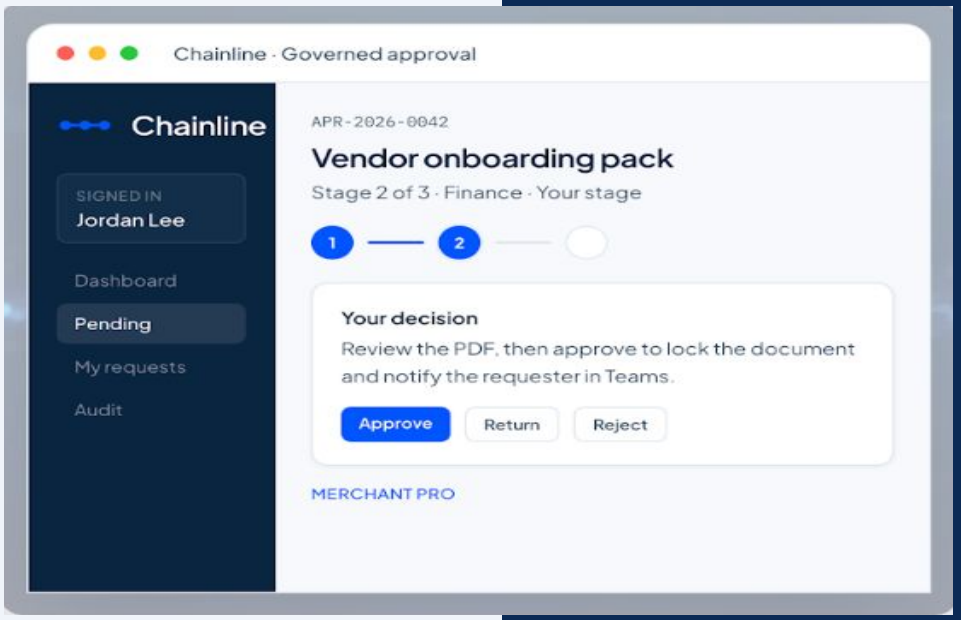

- Sign in with Microsoft Entra ID
- People picked from your tenant directory
- Teams notifications via Microsoft Graph
- Teams app package for admin-controlled deployment

Your users are already your users.

Chainline

Approvals that move work forward.

The document approval workspace for Microsoft 365 — clear chains, decisions in Teams, and an audit trail your organisation can trust.

Start with the demo, then deploy for your organisation.

See Chainline with Merchant Pro sample data. We then provision a dedicated environment for your tenant.

chainline.arcloops.ai · info@arcloops.ai

Built for Microsoft Entra ID and Teams.
Dedicated deployment for your organisation.

HOW IT WORKS

How Chainline works

1. **Sign in with Microsoft**
   Use your organisation's Entra ID. No separate Chainline password.
2. **Submit with a chain**
   Pick a template or build a custom path with people from your directory. Attach the document.
3. **Decide on the stage**
   Approvers approve, return or reject at each stage.
4. **Trail everything**
   Every action is recorded, so auditors can review without editing.

CAPABILITIES

Everything your approval process actually needs

Designed for organisations that outgrow email and one-size approval apps.

- ✓ **Requests & versions**
- ✓ Chain templates & custom paths
- ✓ Stage decisions
- ✓ Advisory voting
- ✓ Teams notifications
- ✓ Audit & compliance
- ✓ Administration
- ✓ Security baseline

WHO IT'S FOR

Built for teams that cannot afford fuzzy sign-off

IT
SSO, Teams packaging, dedicated deployment and clear admin controls.

COMPLIANCE & AUDIT
Trails, flags, exports and a read-only auditor role.

PROCUREMENT & OPERATIONS
Chains for repeatable document types.

LEGAL & HR
Policies, contracts and onboarding packs with a clear chain.

Designed to be shown to security and audit

Authentication is Microsoft-only. Authorisation is role-based. Files are not parked on public URLs. Actions leave a trail.
